KAYAKING EXCELLENCE

It's been 30 years since we've started our quest to
create the ultimate quality and design kayak...

[JOIN US](#)

PRODUCING TOWARDS EXCELLENCE

It's been a while since we've started our first balsa wood kayaks back in the late 70's.

Since then we have embraced kayak manufacturing with all our hearts. We developed craftsmanship that allows us today, to produce a High-End Quality / Design and attention to detail kayak.

We've been constantly updating design and manufacturing processes over the years and nowadays we have adopted 3D Computer Design to assist hand shaping, creating symmetrical and flawless surfaces and proven engineered hulls and decks. Besides the over the years perfected wet lay up lamination, we're

introducing Resin Infusion and the strongest and lightest sandwich lay ups. Accessories wise, we only use specialized third party parts. We have chosen the best available in the market from different manufacturers.

The design in our kayaks is key. Our image is created by award winning designers . The result are stunning paint jobs, modern graphics and some creative features such as the New Wood Veneer Series, The "Woodie".

PROUDLY  
MADE IN EUROPE

FROM PORTUGAL TO THE WORLD

Countering the tendency to dislocate production to cheap labour countries, Goltziana's production process and quality is assured by the founder itself from scratch.

Everyone from our specialized team of workers were taught by Eduardo Traveira, and every single one of them, some how share the experience achieved by him over a lifetime dedicated to producing kayaks.

This all results in creating one of the most quality oriented kayak on the market.

THE KAYAKS

A COMPLETE RANGE

A kayak for every need and taste

COME CHOSE YOURS

WAVYAK

GOLTZIANA'S WAVE RIDER

WE PRODUCE KAYAKS SINCE 1979.

It's now time to add wave paddling to our range of products, so we are pleased to introduce you the **WAVYAK!**

SINCE THE 90'S, JOPARESI WAS LOOKING FOR THE IDEAL SURFKAYAK, AND COMBINING HIS DESIGN WITH EDUARDO TRAVEIRA'S EXPERTISE, BOTH CREATED AN HYBRID, HALF SURFKAYAK, HALF WAVESKI: A WAVYAK!

SPECS WAVYAK

LENGTH 2,30 M
WIDTH 0,62 M
WEIGHT 10 KGS
MAX WEIGHT 90 KGS

Goltziana™
★ 1979 ★

FEATURES

Flat Hull, with round edge on the front, sharp edge on the rear, overall 60/40 bodyboard inspired rail and slight V concave on the rear of the fins line. The outcome: responsiveness, control and speed!

Medium rocker, to not compromise the speed

Square Tail, Tail: square, with "power box", to quick turns, to speed up the take off and avoid the sinking in the end.

Construction: Fiberglass or Kevlar/Carbon

Gear as a SurfKayak:knee straps, backrest, footrests, hand toggle, set of 3 fins

Gear as a WaveSki:: foot strap, seat belt, hand toggle and set of 3 fins.

FIJI

The Fiji

This kayak is most suitable for small to medium size paddlers. A favourite among women paddlers. The Fiji is a fast and very maneuverable kayak for its length, with no need for rudder. It behaves very well on the open sea, although being a kayak for the intermediate paddler and not so extreme conditions. Comfort is a key aspect on this kayak and the Cargo capacity is very good, allowing the paddler to take the Fiji for those longer paddles. A very good kayak to start paddling with.

SPECS	
LENGTH	4,83 M
WIDTH	0,58 M
WEIGHT	19 KGS
MAX WEIGHT	95 KGS

SOLARIS

The **New** Solaris

Inspired by the Esquimo type kayaks, the Solaris is our top performer in high winds and rough seas. The outstanding lateral stability is assured by the chined design of the hull. This feature enables paddlers to make extreme lateral maneuvers without getting wet. It feels like the Solaris is much wider than it really is. With good space for cargo, this is the ideal choice for the paddler who wants to have fun in the sea, and yet make short to medium plus autonomy paddles. Due to its out of the ordinary stability and maneuverability, this kayak can be used as a beginners kayak and at the same time by experienced paddlers that want to take their paddling to the extreme.

SPECS	Solaris
LENGTH	5,00 M
WIDTH	0,55 M
WEIGHT	20 KGS
MAX WEIGHT	110 KGS

MARLIN

The Marlin

The Marlin has been designed for the paddlers who want a kayak that glides in the water. Very fast and stable, this is the ideal kayak for the great scenarios.

The cargo capacity is very generous allowing it to be the best option for expeditions and long paddles. Due to it's volume it can fit heavier and bigger paddlers without compromising performance.

SPECS

LENGTH	5,18 M
WIDTH	0,58 M
WEIGHT	22 KGS
MAX WEIGHT	125 KGS

KITIWEC

The Kitiwec

The kayak for the experienced paddler. The kitiwec is excellent for extreme sea conditions. It's hull design with twin high tips makes it easy to overcome the waves. Outstanding entering the sea in heavy shorebreaks. The reduced height of this kayak makes it highly resistant to wind. The choice for thrill seekers

SPECS	
LENGTH	5,37 M
WIDTH	0,56 M
WEIGHT	20 KGS
MAX WEIGHT	120 KGS

ASSUT

The Assut

The "two seater" is an extraordinarily comfortable, safe and stable kayak. Ideal for both small and big expeditions. Excellent behaviour in any sea conditions. It has a remarkable cargo capacity and the fact of being equipped with two oval hatches, makes access much easier.

SPECS	
LENGTH	6,00 M
WIDTH	0,61 M
WEIGHT	26 KGS
MAX WEIGHT	250 KGS

Woodvener Kayak Series

THE *NEW* WOODIE KAYAK

The First Wood Finish Laminat

100% FIBER GLASS

The "Woodie"

This series is the result of years trying to find the best compromise between wood finish, lightweight and strength.

This is the first wood kayak 100% laminated with fiberglass. The wood outer layer is a printed fiberglass that keeps all the physical and structural properties optimized for kayak building, this way you get stunning look, weight reduction and structural strength.

Be the first to show off this next step of dazzling "wooden" kayaks. Available in different layouts, colours and wood types on the Marlin, Solaris and Fiji.
